

Standard Nutrient Values for Fruit Juices

This guideline provides standard nutritional values for juices that can be directly used for nutritional labelling purposes. The nutrient levels comply with the range of tolerances foreseen in the ‘Commission guidance on tolerances and rounding rules (December 2012)’. The purpose of this work was to establish nutrition tables for most common juices to support the juice and nectar industry regarding:

- **Nutrition labelling of fruit juices and nectars**
- **Nutrition communication to stakeholders**
- **And benefiting replies to clients and customers regarding the nutritional values of common juices**
